

# Business Integration of Enterprise Solutions

## Overview

The scope for business integration of Knowledge Solutions build with Intellix Technology is considerably enhanced by use of the trigger service system, which has become an integrated part of the Intellix Solution Framework. Among the primary purposes of triggers are the prospects for integration to legacy applications and other 3rd party IT systems, including structured retrieval from and storing of data with other applications such as in-house database systems. The course is designed to introduce participants to the Trigger Service System and to provide the necessary knowledge and skills that will enable these to conduct backend business integration of Intellix Solutions on their own. To ensure this and to let participants test their gain of practical skills six hands-on exercises are included as an integral part of the course.

## Prerequisites - Knowledge and courses

- Experience in COM Development
- Introductory Course IX01 - Knowledge Mapping with the Intellix Designer
- Introductory Course IX02 - Introduction to the Intellix Solution Framework

## Audience - Who should attend

- Solution developers affiliated with major Intellix customers
- Technical consultants affiliated with Intellix partners

## Objectives - Knowledge and skills you will learn

- To provide you with an understanding of the architecture of the Trigger Service System
- To enable you to add backend integration to Intellix solutions
- To provide you with details and hands-on experience regarding design, implementation and test of triggers

## Course outline - Topics that will be covered

- Outline of the Trigger Service System
- Types of triggers and implementation strategies
- Trigger Development Tools and Utilities
- The Intellix Repository and how to add/register triggers with it
- The Intellix Trigger Test Bench
- Trigger execution and validation of trigger output
- Applying Trigger to Knowledge Domains
- How to activate a trigger
- How to supply input to Triggers
- Six hands-on trigger development exercises

## Next steps - Suggested courses

- Solution Building Course SD02 - Presentation Layout for Enterprise Solutions
- Solution Building Course SD03 - Storing Sessions with Enterprise Solutions

## Course registration

Course registration can be handled directly by calling Intellix throughout the day hours. Alternatively, you can use the [course registration form](#) or send an email to above address.

In case you prefer to stage an Intellix course in-house for a class of colleagues, please contact us for a special offer.

Various rebates apply if you participate in all the courses in a course track or in case two or more persons from the same organisation participate in a course.
